SUMMARY

Full-stack engineer with published research on LLM-based REST API automation (arXiv, 2024). Building ERP/HRMS modules with React, Next.js, TypeScript, Node.js, and PostgreSQL on Azure, with experience in distributed, event-driven backend systems and REST API design.

EXPERIENCE

Indus Novateur Softech Pvt. Ltd

Chennai, India

Full-Stack Developer

Jun 2026 – Present

- Building an HRMS module within a cloud-native, microservices-based ERP suite using React, Next.js, TypeScript, Node.js, and PostgreSQL, deployed on Azure App Service.
- Contributing to REST API and relational schema design for distributed employee-data workflows; supporting CI/CD (Azure DevOps) and infrastructure-as-code for service deployment.

Tactii (formerly TalentAccurate) Pvt. Ltd

Toronto, Canada (Remote)

SDE Intern

Aug 2023 – Apr 2024

- Built 5+ backend APIs (Flask, FastAPI) that generate REST API test cases from natural-language prompts, cutting manual QA effort by ~60% per testing cycle.
- Integrated GPT-2 (Hugging Face Transformers, PyTorch) with prompt engineering to produce Postman-compatible test cases at ~80% structural accuracy across 200+ prompts.

Plasmid Pvt. Ltd

Chennai, India

Web Development Intern

Jul 2024 – Sep 2024

- Built responsive UI components across 4+ web modules (HTML, CSS, JavaScript, Flexbox/Grid), reducing reported frontend issues by ~30% and improving cross-device UX.

PROJECTS

Automatic Testcase Generator | Python, Flask, GPT-2, Transformers, PyTorch, REST API

- Built an AI-powered tool generating Postman-compatible API test cases from natural-language prompts, reducing manual test authoring time by ~65% in internal trials.

Webhook Delivery Engine | Java, Spring Boot, JPA, MySQL, Docker, AWS EC2

- Built an async, event-driven fan-out engine delivering HTTP POST webhooks to subscribers with per-attempt tracking across a 4-table schema.
- Configured exponential backoff retry (3 attempts, 30/60/120s) via Spring Scheduler with SQL-persisted audit logs; containerized with Docker Compose and deployed on AWS EC2.

DeepMorph — AI DNA Mutation Prediction | Python, PyTorch, CNN-LSTM, FastAPI, NumPy

- Engineered a hybrid CNN-LSTM multi-task learning system for DNA sequence analysis, predicting mutation status, gene classification, and clinical significance across 3 output tasks.
- Deployed an end-to-end inference pipeline with FastAPI, reducing manual classification effort by ~50%.

RESEARCH PUBLICATION

Automating REST API Postman Test Cases Using LLM | arXiv, Apr 2024

- Developed a method to automatically generate REST API test cases using large language models, improving testing efficiency and reducing manual effort. arxiv.org/abs/2404.10678

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, C/C++

Frontend: React, Next.js, HTML, CSS, JavaScript, Responsive UI/UX

Backend: Node.js, Spring Boot, FastAPI, Flask, REST APIs, Distributed Systems, Microservices

AI / LLM: Prompt Engineering, LLM Integration, Hugging Face Transformers, PyTorch, TensorFlow; AI Coding Tools (Claude Code, GitHub Copilot, Cursor)

Databases: PostgreSQL, MySQL, MongoDB

DevOps & Tools: Docker, Azure App Service, Azure DevOps, Infrastructure-as-Code, GitHub Actions, AWS, Git, Linux, Postman

EDUCATION

B.S. Abdur Rahman Crescent Institute of Science and Technology

Vandalur, Chennai

B.Tech, Computer Science and Engineering — CGPA: 8.54

2022 – 2026
